

Dear A.I.,

10/27/80

Don't know anything about Reagan's military career. Agree with you on how the election/choices look.

High pressure on the blood-pressure cuff is a standard test for thrombosis in the calf but with me it didn't work. If you have any reason to believe you may have such troubles, don't be your own doctor.

In my belief walking is the best exercise for such conditions and for those of us who have accumulated a few years. Right now it worries me that I can't walk much. And almost everything else is forbidden until after two days from now, when I'm checked again. I feel no forward motion.

Thanks for the story on the acoustical tape and the new effort to bury it. Earl probably was not aware but the people DJ has doing the work are outside the FOIA law, so a devil like me can't come along seeking their scripture.

I keep on getting records and I'm able to read them. Some I just got hold what is new to me, that back in LBJ's day the DJ had its own "task force" in secret support of the Warren Commission.

Many people wrote many letters but I've yet to find one that caused any bureaucrat to suggest anything like an investigation. They all got form-letter replies, including those that were forwarded by Senators.

So nothing troubled anybody.

Thanks and best wishes,
